The subtitle "A molecular approach" is extremely fitting for this unique P. Chem textbook. Many P. Chem textbooks (like Atkins et al) start with thermodynamics and thermochemistry. However, there is a problem -- statistical mechanics is necessary for any reasonable modern understanding of thermodynamics.

The Cell is focused on the molecular biology of cells as a unifying theme, with specialized topics discussed throughout the book as examples of more general principles.

Aspects of developmental biology, the immune system, the nervous system, and plant biology are thus discussed in their broader biological context in chapters covering areas such as
