Autobody Flat Rate Labor Guide

Flat-rate labor is applied to labor guides. A certain amount of time is involved on replacing a car starter on a certain year, make and model vehicle. If the labor guide dictates it takes 2.3 hours to replace the starter, then the customer pays for the new starter, plus the 2.3 hours of labor to install it.

Automotive Repair Labor Guide | It Still Runs

Most auto repair shops quote labor charges using a "flat rate" manual or computer program that provides the average time it takes an experienced technician to perform a given car repair. That flat-rate time is then multiplied by the shop's hourly labor rate to reach the total labor charge for the service.

Flat Rate Calculator is a tool for bodyshops that use a team approach. In other words shops that use the flat rate system, yet have more than one person working on every vehicle will find this tool useful. Instead of trying to break up metal and paint labor and distributing it among different departments and different techs, shops that use the team approach can use this calculator to more fairly distribute labor.
