### **Bank Liquidity Creation, Monetary Policy, and Financial Crises**

Bank liquidity creation is shown to be statistically and economically significantly positively related to real economic output, as well as illiquid assets and core deposits. Larger banks increase their liquid assets ratio, but decrease their credit commitment.

### **Bank Liquidity Creation, Regulations, and Credit Risk ...**

Bank liquidity creation is positively correlated with bank value. Testing recent theories of the relationship between capital and liquidity creation, we find that the relationship is positive for large banks and negative for small banks.

### **Bank Liquidity Creation | The Review of Financial Studies ...**

The standard view of liquidity creation is that banks create liquidity by transforming illiquid assets

into liquid liabilities. Diamond and Rajan (2000, 2001) and Gorton and Winton (2000) show, however, that banks can create more or less liquidity by simply changing their funding mix on the liability side. Thakor (1996) shows that capital
