Answer: When an object is released from a height, it falls

Download Ebook Chapter 9 Free Falling Answer

towards the surface of Earth under the influence of gravitational force. The motion of the object is said to be free fall. 2. What do you mean by acceleration due to gravity?

Chapter 10 Gravitation | Class 9, NCERT Solutions, Science

Why does a person in free fall experience weightlessness, while a

Download Ebook Chapter 9 Free Falling Answer Key

person falling at terminal velocity does not? A person is weightless when the only force acting is gravity, and there is no support force. More than gravity acts on the person falling at terminal velocity. In addition to gravity, the falling person is "supported" by air drag.

Free Fall Formula

Freefall as the term says, is a body falling freely because of the gravitational pull of our earth. Imagine a body with velocity (v) is falling freely from a height (h) for time (t) seconds because of gravity (g).

Chapter 9 (Gravity)

The reason that a heavy body doesn't fall faster than a light body

Download Ebook Chapter 9 Free Falling Answer

is because the greater gravitational force on the heavier body (its weight), acts on a correspondingly greater mass (inertia). The ratio of gravitational force to mass is the same for every body—hence all bodies in free fall accelerate equally.
