Engineering - @SIM (IVII)
Historically, the distances were determined by using chains of a predetermined length, angles were measured by the use of a compass, and height was measured by an altimeter. All these measurements were utilized for carrying out survey of the desired areas. Modern technology has developed high tech instruments for surveying that are more efficient, reliable, and accurate, such as the GPS ...

With 30+ years of experience in engineering surveying and site work I have gained a broad and extensive range of skills which allow me to fulfil a variety of roles. Whilst seeking to add value to every project I actively endeavour to pass on my experience to engineers and surveyors in the early stages of their careers.
