Amazon.com: Data Flow Diagrams - Simply Put!: Process ...

A data flow diagram shows the way information flows through a process or system. It includes data inputs and outputs, data stores, and the various subprocesses the data moves through. DFDs are built using standardized symbols and notation to describe various entities and their relationships.

Data Flow Diagram Symbols, Types, and Tips | Lucidchart

A data flow diagram (or DPD for short) shows how processes flow through a system. It also gives you information about things such as the inputs and outputs (where things come from, which route they go through, and where they end up), and the process itself. This includes data stores and the various subprocesses the data moves through.
