### **Google ...**

The latter is accomplished by meeting with cloud vendors before you sign up with them, exposing to them what your data maintenance, security and governance requirements are, and then putting together a collaborative team of vendor and in-house IT staff to run and oversee the apps and data you choose to deploy on the vendor's cloud.

### **Deploying and Managing Hybrid IT Architectures ...**

Cloud computing is the on-demand availability of computer system resources, especially data storage (cloud storage) and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Large clouds, predominant today, often have functions distributed over multiple locations from central servers.
