As a reference unit for climate plans, a tonne of carbon dioxide remains an abstract notion for most of us.. What is CO 2?. Carbon dioxide is an invisible, odourless and colourless gas. This does not prevent it, like the air, from having a mass: 1,964 g/litre or 1.964 kg/m 3.These equivalents will help you understand the scales we're talking about when discussing one tonne of CO 2:

What exactly is a tonne of CO2? - Energuide

An automatic circuit breaker is increasingly being used as an alternative to the earlier fuse. Both protect against short circuits and overloads, but whereas a circuit breaker can simply be reset, a fuse always needs to be replaced.

What is an automatic circuit breaker? - Energuide

The EnerGuide label The distinctive EnerGuide label is a familiar sight to most Canadians. We see it when we shop for new appliances, look at the literature for a new furnace or read the fine print on a light bulb package. The EnerGuide label lets us know how much energy a product uses and how that compares to similar models.
