A number of T accounts are typically clustered together to show all of the accounts affected by an accounting transaction. The T account is a fundamental training tool in double entry accounting, showing how one side of an accounting transaction is reflected in another account. It is also quite useful for clarifying the more complex transactions.

T account — AccountingTools

Financial accounting (or financial accountancy) is the field of accounting concerned with the summary, analysis and reporting of financial transactions related to a business. This involves the preparation of financial statements available for public use. Stockholders, suppliers, banks, employees, government agencies, business owners, and other stakeholders are examples of people interested in ...
