the Pazon Smart-Fire Triumph Trident /BSA Rocket 3 Ignition System. My T150V is freshly rebuilt, but the spark was poor and just kept 'holding back' at wide throttle openings, fitted with another supplier's system. I looked at the PAZON Smart-Fire, thought it was expensive but looked very professional,

Pazon Ignitions Limited

All other triples used crankpins 120 degrees apart. but the Laverda placed its crankpins 180 degrees apart. This gave the effect of a British vertical twin with an extra cylinder in the middle and the 1000 always shook. In 1982 Laverda changed to the more usual 120 degree crank. but some of the rawness of the earlier bike was lost.

Search results :: Pazon Ignitions Limited

An inline three-cylinder engine with 180° crankshaft can be found in early examples of the Laverda Jota motorcycle made by Italian manufacturer Laverda. In these engines, the outer pistons rise and fall together like a 360° straight-two engine. The inner cylinder is offset 180° from the outer cylinders.

Through the 1970s, Laverda's 750SFC twin and 1000 Jota triple were the weapons of choice in 24-hour racing in Europe. The company intended its new-for-1977 mid-size 500cc, double overhead camshaft, 6-speed Alpino (Zeta in the U.S.) to support the same business model of "win on Sunday, sell on Monday."
