12 ©2010 MaxxForce 11 and MaxxForce® 13 Engine Training Program System Sensors The engine oil level sensor is located on the lower left side of the crankcase. The ECM sends a signal to this sensor when the ignition is turned On and the engine is Off. The ECM measures the time it takes for the signal to return back to the ECM. Based on the engine

2010 MaxxForce 11 and MaxxForce 13 Engine Training Program

One experience I had with a Cat engine with low oil pressure after a rebuild. We changed the pump, regulator etc, etc trying to track down a low oil pressure issue. Finally we dropped the pan and pulled a bearing cap off. Standard bearings had been installed and the engine crank had been machined and needed oversized bearings.

Navistar / International EGR Coolers | Maxxforce 15,13,11 ...

The oil filter is responsible for keeping the contaminants out and ensuring that the clean fuel reaches the engine. Over time, dust and debris clog the oil filter and as a result, sn inadequate amount of fuel does not reach the engine. Consequently, the engine's temperature rises which leads to high oil pressure. 6. Blocked Passage

SummaryofChanges - Quality Service Manual

The Maxxforce 13 is what typically was found in Class 8 trucks and was the engine just about everyone hated. I never heard much about the 10 having the same run of problems. I believe it was more closely related to the DT line of Internationals engines which are generally considered bulletproof.
