Microeconomics (from Greek prefix mikro-meaning "small" + economics) is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms.. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and ...

Microeconomics - Wikipedia

Microeconomics examines the most basic of economic transactions by focusing on behavior by individuals. It is assumed that individuals always act with economic rationality; it is further surmised that companies make decisions that will maximize profits. You choose to work at a job, say in a grocery store.
