Surfactants - classification, features and applications

Surfactants
(amphipathic
molecules consisting of
hydrophobic and
hydrophilic portions)
are essential materials
for preparation of
many industrial
systems, of which we

Where To Download Novel Surfactants

mention dyestuffs, paper coatings, inks, agrochemicals, pharmaceuticals, personal care products, ceramics, and detergents. One of the most important applications of surfactants is in the preparation of oil-in-water (o/w) and water-in-oil (w/o) emulsions.

Polymeric Surfactants and Their Applications:

formulating with surfactants would have been so much more productive! This book, therefore, contains everything that I know about surfactant science that can be useful to someone (such as myself) who formulates with surfactants. So it is a good idea to make it clear right from the start that although there are
