Perspectives On Human Memory And Cognitive Aging Essays In ...

The cognitive perspective is concerned with "mental" functions such as memory, perception, attention, etc. It views people as being similar to computers in the way we process information (e.g., input-process-output). For example, both human brains and computers process information, store data and have input an output procedure.

Psychology Perspectives | Simply Psychology

Adult age changes in human memory. Many older adults feel that their memory does not serve them as well as when they were younger 1, 2. Yet, objective assessments of memory have yielded a more differentiated picture. For one thing, subjective memory complaints may correlate more strongly with mood states than with objective memory performance . Moreover, not all forms of human memory are equally affected by advancing age.

Memory aging and brain maintenance - ScienceDirect

An influential theory of memory known as the multi-store model was proposed by Richard Atkinson and Richard Shiffrin in 1968. This model suggested that information exists in one of 3 states of memory: the sensory, short-term and long-term stores.
