Adequate negative correlations with measurement of postural stabilization ($r = 0.48$) and postural orientation with respect to gravity ($r = 0.36$) (Benaim et al, 1999; $n = 31$; 90 days post stroke) Acute Stroke: (Mao et al, 2002) Excellent convergent validity between PASS and BI ($p = 0.88-0.92$) Acute Stroke: (Hsieh et al, 2002)

Postural Assessment Scale for Stroke | RehabMeasures Database

Dynamic pre and 4-weeks post-workshop photos of participants' posture were scored with a modified REEDCO Posture Score Sheet. Musculoskeletal symptoms at baseline and pre-workshop pain ratings using the Numeric Pain Rating Scale (NPRS) were collected via a survey. A 4-week post-workshop NPRS of identified body regions was elicited via email.

Samar | NTID Research

Subjects were told to stand in their best posture. The RPS was administered by assigning an ordinal value from 0 to 10 by visual inspection of 10 postural traits viewed laterally or from behind. To measure the KI, a flexicurve ruler was placed along the spine and the molded shape of the spinal curve was traced on grid paper.

TEST-RETEST AND INTERRATER RELIABILITY OF TWO POSTURAL ...

Reedco's Posture score (RPS) and visual analogue scale (VAS) were the outcome measures. The subjects were assessed for pain in ten major joints and rated on a VAS. A standard posture assessment was conducted using the Reedco's Posture score. The same procedure was executed for an age- and sex-matched control group.

Evaluation of posture and pain in persons with benign ...

Again, posture is just an indicator of what may happen during movement. Movement is king though. Don't get too caught up in the anatomy involved. While it's important and good to know, at the end of the day you don't think about correcting one muscle; you think about correcting movements. It's not plausible to expect a client to know ...
