### The Faith Instinct How Religion

"The Faith Instinct" discusses, with great care and excellent logic, recent thinking about how religion may have begun (with totally egalitarian hunter-gatherer groups some hundreds of thousands of years ago), what purpose it served (creating cohesion within groups, the better to prevail against attacks by neighboring groups), its practices (dance, music, and appeal to gods), and how it changed with agriculture and the rise of cities (no longer egalitarian, but with social stratification and ...

### The Faith Instinct: How Religion Evolved and Why It ...

In The Faith Instinct, Nicholas Wade argues that religion is a gene-based adaptation that allowed those groups that had it to survive where those without perished, "religion" being defined as "a system of emotionally binding beliefs and practices in which a society implicitly negotiates through prayer and sacrifice with supernatural agents, securing from them commands that compel members, through fear of divine punishment, to subordinate their interests to the common good." (p.

A few words as starter. A sincere, even terrible difficulty of many a good man is "If God is good, why does he allow suffering (in all its forms)". In its sincere form, it requires a lifetime of learning (learning the truth of the necessity of suffering in a fallen world); and for the thinker,...

### Qn: If God is good, why is there suffering in this world ...

Fear is an emotion induced by perceived danger or threat, which causes physiological changes and ultimately behavioral changes, such as fleeing, hiding, or freezing from perceived traumatic events. Fear in human beings may occur in response to a certain stimulus occurring in the present, or in anticipation or expectation of a future threat perceived as a risk to oneself.
