Project 7 | Workflow Modeling and Process Management

While all can be used for workflow and process modeling, they are generic and offer no specific support for clinical modeling. Having used these modeling tools, I found them to be useful mostly for small problems. Trying to use them to capture complex processes and interactions was a no-go. There are too many types of diagrams.

In this article, I take an indepth look at using Camunda BPMN (Business Process Modeling Notation) to build a non-trivial internal tool for my workplace. Camunda BPMN process definitions are simultaneously a graphical and textual representation of an executable workflow. I find the technology very interesting as it works both a visual communication tool and as a low code rapid development system.

A Detailed Look at Camunda BPMN Application Development
